

7. Mapping / Declaration of Individual Performance

This section outlines the individual contributions of each team member during the development of the memory game project. Roles were fluid throughout the project, with all coding-related tasks handled collectively. Each team member brought unique strengths while supporting one another during implementation and integration phases.

Arda

- Co-developed game initialization and prototype pitch
- Designed and implemented:
 - Pointing system
 - First level of the game
 - Main screen and screen transitions
 - HUD components (timer, clicks)
 - Value transportation logic
- Handled Android APK and PC executable builds
- Led audio integration (background music, flip sound)
- Co-designed the UI: buttons, screen layout, and color palette
- Co-wrote the following documentation:
 - Requirements
 - Architecture
 - Test
 - Acceptance
 - User documentation
- Co-polished the documentation before testing and final submission
- Co-created the final presentation materials (slides, screen recordings)

Esma

- Co-developed game initialization and prototype pitch
- Designed the game cards
- Co-designed UI (buttons, screen design, color palette)
- Co-developed main screen and screen transitions
- Co-wrote the following documentation:
 - Requirements
 - Architecture
 - Test
 - Acceptance
 - User documentation
- Took lead in:
 - Polishing and proofreading documentation before submission
 - Structuring and writing the "Mapping / Declaration of Individual Performance"
- Co-prepared the final presentation (slides, screen recordings)

Nikunj

- Helped develop the first level of the game
- Contributed to:
 - HUD development (timer and clicks)
 - Value transportation logic
 - Audio integration (flip sound, background music)

Manan

- Contributed to HUD and value transportation logic
- Co-wrote the Project Documentation
- Reviewed all documentation to ensure consistency with lecture standards
- Helped with polishing documentation before the final submission
- Prepared the tutorial video

Rutvik

- Co-wrote: Requirements Documentation & Project Documentation
- Reviewed and validated documentation based on lecture expectations
- Focused on checking structure and completeness of content
